

Special Lectures

Affective psychopathology.

E. Binder (Max Planck Institute of Psychiatry, Munich)

Training the brain to be social: lessons to be learnt from autism.

I. Dziobek (Humboldt-Universität zu Berlin)

Neurobiology of fear and trauma memory.

E. Hermans (Radboud University, Nijmegen)

Lectures

Ecological approaches to affective neuroscience

K. Schruers (Maastricht University)

Panic & Vital Threats

G. Perna (Humanitas University, Milan)

From fear extinction to exposure therapy

U. Lüken (Humboldt-Universität zu Berlin)

The longitudinal development of anxiety

F. Cosci (University of Florence)

Obsessions & Compulsions @ the brain

K. Schruers (Maastricht University)

TMS for OCD spectrum: toward personalization

S. Pallanti (University of Stanford)

Stress & Trauma

J. Zohar (Tel Aviv University)

Board of Directors:

Koen Schruers (Chairman) (Maastricht University)

Stephan Claes (University of Leuven)

Fiammetta Cosci (University of Florence)

Sean Hood (University of Western Australia)

René Hurlmann (Carl von Ossietzky University of Oldenburg)

Keith Kendrick (University of China, Chengdu)

Ulrike Lüken (Humboldt-Universität zu Berlin)

Andrea Malizia (University of Bristol)

Dean Mobbs (Caltech)

David Nutt (Imperial College London)

Stefano Pallanti (University of Stanford)

Giampaolo Perna (Humanitas University, Milan)

Joseph Zohar (Tel Aviv University)

This course is part of the Summer School on Affective Neuroscience, which aims at getting closer to understanding the mechanisms behind human psychopathology.

The Summer School provides an in-depth analysis of neurobiological mechanisms underlying emotional behavior as virtually all psychiatric disorders are characterized, or at least accompanied, by some degree of emotional disturbance.

The Summer School offers an ideal opportunity for clinicians, both psychologists and medical doctors, and young scientists to update their knowledge and expertise on the fundamentals of affective pathology. The teaching format is a challenging combination of lectures and small group workshops, with ample opportunities to discuss with leading scientists in the field
